#Submission

Government and law-enforcement requests must identify the agency and officer, legal authority, account identifiers, requested records, date range and return contact. Send through the designated legal channel; ordinary support cannot accept legal process.

#Review and scope

Nexa verifies authenticity, jurisdiction, legality, necessity and proportionality and seeks clarification or challenges overbroad requests where appropriate. We disclose only responsive data we possess and are legally compelled or permitted to provide.

#Notice, preservation and emergencies

We notify affected users before disclosure unless prohibited, an emergency exists or notice would create a defined risk. Valid preservation requests are time-limited. Emergency disclosures require a good-faith danger of death or serious physical injury and sufficient facts.

#Cross-border requests

Foreign authorities should use applicable mutual legal assistance, cooperation or other lawful mechanisms. Requests are assessed under DRC law and applicable international obligations.

#Privacy and compliance baseline

Nexa applies data minimization, purpose limitation, accuracy, security, accountability and privacy-by-design. This document is intended to align with applicable GDPR principles, Canadas PIPEDA fair-information principles, the African Union Malabo Convention and applicable DRC law; mandatory local rights prevail.

#Contact and changes

Questions, rights requests and complaints may be sent using the contacts below. Material changes will receive reasonable notice where required. The version and dates above identify the controlling edition. Translations are intended to be equivalent; if an inconsistency cannot be resolved, the French edition controls, subject to mandatory law.
