#Risk-based framework

Before regulated wallet or payment functionality launches, Nexa will assess products, customers, geographies, channels and transaction risks and implement controls proportionate to its legal role and licenses.

#CDD and monitoring

Controls may include customer identification, beneficial-owner information where relevant, enhanced due diligence, source-of-funds questions, transaction monitoring, recordkeeping and ongoing review. Anonymous or fictitious accounts are prohibited.

#Suspicious activity

Users must not structure, layer, disguise proceeds, use mule accounts or evade limits. Nexa may pause activity, seek information and submit confidential reports to competent authorities where required; tipping off is prohibited.

#Governance and records

The program will assign accountable leadership, training, independent testing and retention generally for at least five years or the period local law requires. This policy does not make currently unavailable financial features active.

#Privacy and compliance baseline

Nexa applies data minimization, purpose limitation, accuracy, security, accountability and privacy-by-design. This document is intended to align with applicable GDPR principles, Canadas PIPEDA fair-information principles, the African Union Malabo Convention and applicable DRC law; mandatory local rights prevail.

#Contact and changes

Questions, rights requests and complaints may be sent using the contacts below. Material changes will receive reasonable notice where required. The version and dates above identify the controlling edition. Translations are intended to be equivalent; if an inconsistency cannot be resolved, the French edition controls, subject to mandatory law.
