#Roles and scope

For user-facing LYNK processing, Nexa Inc SARL generally acts as controller. Where Nexa processes personal data solely on documented instructions for a business customer, Nexa acts as processor and this DPA applies. The parties will document subject matter, duration, purpose, data types and data-subject categories.

#Processor duties

A processor shall process only documented instructions, ensure confidentiality, apply appropriate technical and organizational measures, assist with data-subject requests, breach response, impact assessments and regulator consultations, and delete or return data at the end of services unless law requires retention.

#Subprocessors

Authorized subprocessors may include AWS, Cloudflare, Firebase, PostHog, Sentry and, when enabled, PawaPay and CinetPay. Nexa will impose materially equivalent protection, remain responsible as required by law, and provide notice or an objection mechanism for material changes where contractually required.

#Transfers and audits

Restricted transfers will use adequacy mechanisms, applicable SCC modules, supplementary safeguards and transfer assessments. On reasonable request, Nexa will provide relevant compliance information and permit proportionate audits subject to confidentiality, security and cost controls.

#Incidents

The processor will notify the controller without undue delay after becoming aware of a personal-data breach and provide available information needed for risk assessment, notice and remediation. Notification is not an admission of fault.

#Privacy and compliance baseline

Nexa applies data minimization, purpose limitation, accuracy, security, accountability and privacy-by-design. This document is intended to align with applicable GDPR principles, Canadas PIPEDA fair-information principles, the African Union Malabo Convention and applicable DRC law; mandatory local

rights prevail.

#Contact and changes

Questions, rights requests and complaints may be sent using the contacts below. Material changes will receive reasonable notice where required. The version and dates above identify the controlling edition. Translations are intended to be equivalent; if an inconsistency cannot be resolved, the French edition controls, subject to mandatory law.
